Frontend development using Vue, React, TypeScript and more.

My name is Michael Pumo. I'm a frontend web developer based in London, UK and I'd like to help you build your next project.

About

I'm Michael Pumo, an experienced frontend web developer with over 15 years of experience in both full-time and contract positions alike.

Whether I'm working as part of an existing team or simply as a solo developer, I'm able to think on my feet, adapt and take ownership where needed, ensuring a successful project delivery from start to finish.

Whilst we all enjoy our favourite tools and tech, every project is different. For this reason, I firmly recognise the importance of finding the right tool for the job as frontend development occupies an area in continuous progression. Because of this, I've become experienced in a range of frontend frameworks and tooling from React and Next to Vue and Nuxt; from JavaScript to TypeScript and everything in-between.

With my background in digital design, I'm able to work closely with designers and UX teams to bridge the gap from design to digital production. My goal is always to translate flat designs into faithful and accurate pixel-perfect work that's accessible to use.

I've been applying this mindset in my career with clients all the way from boutique SMEs to multinational corporations.

Thank you for considering me for your next project. I look forward to working together soon.

Clients

I'm proud to have worked with some fantastic companies over the course of my web development career.

From content-managed static sites with a headless CMS to eCommerce shopping experiences.

SomeOne.	RAGGED EDGE	the hoxton	AllofUs
Foolproof	MoneySavingExpert Cutting your costs, fighting your corner	parallel	Rotate°
STUDIO MAKGILL	IIIOF	Limesharp	GREGGS

Expertise

Every project is different and so is
the technology that powers it.

I'm always striving to evolve my knowledge of the
emerging frontend tech-stack. You can typically find
me using Vue, TypeScript, Next and much more.

Recent Projects

Everything In Between

April 2024 – May 2024 / Senior Developer
Web development for LUCA restaurant using Nuxt,
Storyblok, Netlify and TypeScript.

#React
#TypeScript
#Nuxt
#PostCSS

Studio 206

February 2024 – April 2024 / Senior Developer
I worked with the team to develop a new website for
OnTheEdge with React, Next JS and TypeScript.

#React
#TypeScript
#Next
#Tailwind CSS

Hugo & Cat

August 2023 – January 2024 / Senior Developer
I worked with a team of Umbraco developers to improve
the frontend code, fix bugs, resolve issues and implement
new features for a site they recently developed.

#Handlebars
#JavaScript
#SCSS
#Storybook

Studio Parallel

April 2023 – June 2023 / Senior Developer
Redevelopment of their agency website as
a statically generated web app using Nuxt 3 (Vue 3)
with Storyblok as their CMS.

#Vue
#Nuxt
#TypeScript
#Storyblok
#Tailwind CSS

Greggs

February 2022 – March 2023 / Lead Developer
Upgrading their existing codebases to Nuxt 3 and
refactoring large parts of their design system.

#Vue
#Nuxt
#TypeScript
#Storyblok
#Tailwind CSS

GoodLove

December 2021 – January 2022 / Freelance Developer
Data visualisation requirements for the State Of European Tech 21 website demanded the use of GSAP with ScrollTrigger inside custom React components. Once complete, we then integrated these into a Gatsby site for the final static generation with a WordPress CMS.

#React
#GSAP
#JavaScript
#Gatsby
#Wordpress
#PostCSS

Studio Makgill

September 2021 – November 2021 / Senior Developer
I was sub-contracted to develop and maintain the websites for this agency's clients. One of which was a greenfield project for General People; I built on Prismic CMS with Nuxt and lots of custom animation with GSAP.
